

## Mini Air Sander 50mm

Gearless mini air sander with 50mm diameter sanding face and silencer. Suitable for most panel repair jobs, its smaller dimensions mean it is ideal for intricate, more delicate sanding. It features a safety trigger lock to prevent accidental use and has variable speed adjustment, with a maximum operating speed of 25,000rpm, and is easily capable of removing paint and metal from bodywork or any other surface requiring treatment.

### Additional Information

- Accurate and precision sanding for removing small amounts of paint.
- Sanding pad: 50mm diameter.
- Fitted with a noise silencer, max 84DB. Includes safety trigger lock.
- Air inlet, quick connector 1/4" BSP. Operating pressure: 90psi (6.2 bar), air consumption: 2cfm. Free load speed: 25000rpm.
- Use with Connect sanding pads, please see Part No. 32109.
